

Z-Tipper

compact design & easy to operate

Its extremely compact design and small footprint enables it to be placed in any office, reception, and store or branch environment alongside other office equipment.

The Z Electronic Tipper allows easy adjustment of temperature and pressure to always obtain a perfect result. Furthermore, the power saving function results in lower power consumption with the machine is idle but in stand-by mode.

The tipping ribbon, for which there are several different colours available, is mounted on an handy cartridge for quick and easy replacement.
